

Hector Clemente Martínez Pérez

Software Engineer – Backend & Data Pipelines

Villa Nueva, Guatemala | (+502) 3693-9072 | clementthee@gmail.com

LinkedIn | Portfolio | GitHub

Professional Summary

Software Engineer with a strong background in backend systems, data pipeline troubleshooting, and platform-level support. Experienced in designing and optimizing scalable workflows, integrating REST and GraphQL APIs, and performing complex log diagnostics using automated tools and AI. Technical stack includes **TypeScript/JavaScript, Python, SQL, Docker, and AWS Cloud services**, backed by a solid foundation in computer science and ongoing specialization in Full Stack Development. Driven by an engineering mindset to build reliable APIs, clean code, and robust integrations.

Technical Skills

- **Languages & Core:** TypeScript, JavaScript, Python, SQL, R, PHP, HTML/CSS
- **Backend & APIs:** REST APIs, GraphQL, Node.js, Webhooks, Microservices
- **Cloud & DevOps:** AWS (Lambda, DynamoDB, API Gateway), Docker, Git, Linux
- **Databases & Analytics:** PostgreSQL, MySQL, BigQuery, Log Analysis, Tableau, Looker

Work Experience

monday.com

2025 – Present

Technical Support Engineer (TSE)

Guatemala

- Diagnose and resolve platform-level technical issues, performing deep-dive log analysis, network monitoring via DevTools, and database integrity checks.
- Provide expert-level technical support for complex workflows, webhooks, and REST / GraphQL API communication pipelines.
- Leverage AI-driven log analysis tools and defensive diagnostic scripts to isolate root causes and accelerate resolution times for high-volume enterprise systems.
- Partner directly with Core Software Engineering and Product teams to file detailed bug reports, reproduce technical edge cases, and deploy permanent fixes.
- Maintain local development environments using Docker and Git to test API schemas and reproduce customer system integrations.

Capgemini

2024 – 2025

Data Analyst

Guatemala

- Executed full-cycle data engineering and analytics tasks: built complex SQL queries, processed data pipelines in R/Excel, and isolated data discrepancies in company-wide reporting.
- Designed and published automated Tableau / Looker dashboards, reducing ad-hoc reporting requests by 25% and providing direct visibility into key business metrics.
- Collaborated with BI and Data Engineering teams to troubleshoot pipeline anomalies and validate data collection endpoints.

ecobee

2021 – 2024

Technical Support Specialist

- Delivered technical support for IoT smart ecosystems; isolated hardware-software communication faults alongside Tier-3 engineering.

Target & TracFone Wireless

2017 – 2021

Customer Service & Credit Specialist

- Managed account diagnostics, financial reconciliations, and connection troubleshooting under strict SLA metrics.

Education & Languages

• **INTECAP** – Technical Specialization in Full Stack Web Development & Cloud Deploy

Enrolled

• **Instituto Guatemala de la Asunción** – Bachelor's Degree in Computer Science

2016

• **Languages:** Spanish (Native / 100%), English (Full Professional / C1 - 95%)

Certifications

- Supply Chain Principles – Georgia Tech (2024)
- EF SET Certificate (C1 Level) – EF SET (2023)

- Google Data Analytics Certificates – Google (2024)
- Excel Basics for Data Analysis – IBM (2024)
